

Wired Set Top Box Self Installation Guide

Pre-Installation Note: The ALLO wired Set Top Box should always be directly connected to the ALLO router.

1. Place your new Set Top Box near the ALLO router and your TV.
2. Connect an Ethernet Cable from your router to your Set Top Box. The corresponding port is circled in red below.

3. Connect your TV to your Set Top Box. In most cases, an HDMI cable is utilized, circled in blue above. Otherwise, use component cables with the corresponding color-match ports.

4. Connect your Set Top Box to a power source.
5. The Set Top Box will and go through a software update process. This process can take 5 to 10 minutes.

During this time, please do not power cycle the Set Top Box.

Follow the instructions on the back of your remote to program it to your TV.
